Safetech Innovations Mission

In early 2011, we envisioned a safer cyber environment for companies with deep security needs. We had the knowledge and means to do it, so it was natural to establish **the first company dedicated to cyber security in Romania.**

We combine our expertise and experience with artificial intelligence to provide our clients with the necessary means to achieve and maintain the desired level of security.

We are passionate about what we do, able to innovate, open to collaboration, goal-oriented and attentive to the particularities of each engagement.

We have our headquarters in Romania and group companies in the United Kingdom, the United States and the United Arab Emirates, locations where, in total, over 80 colleagues work.

Since 2020, we are listed on the Bucharest Stock Exchange (BVB), with the symbol SAFE.

“

We lay the foundations for a secure digital future, by applying the expertise of the Safetech team and artificial intelligence, to protect our customers.

Victor Gânsac

Chairman of the Board of Directors
of Safetech Innovations

Profile Highlights

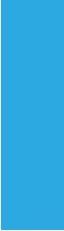

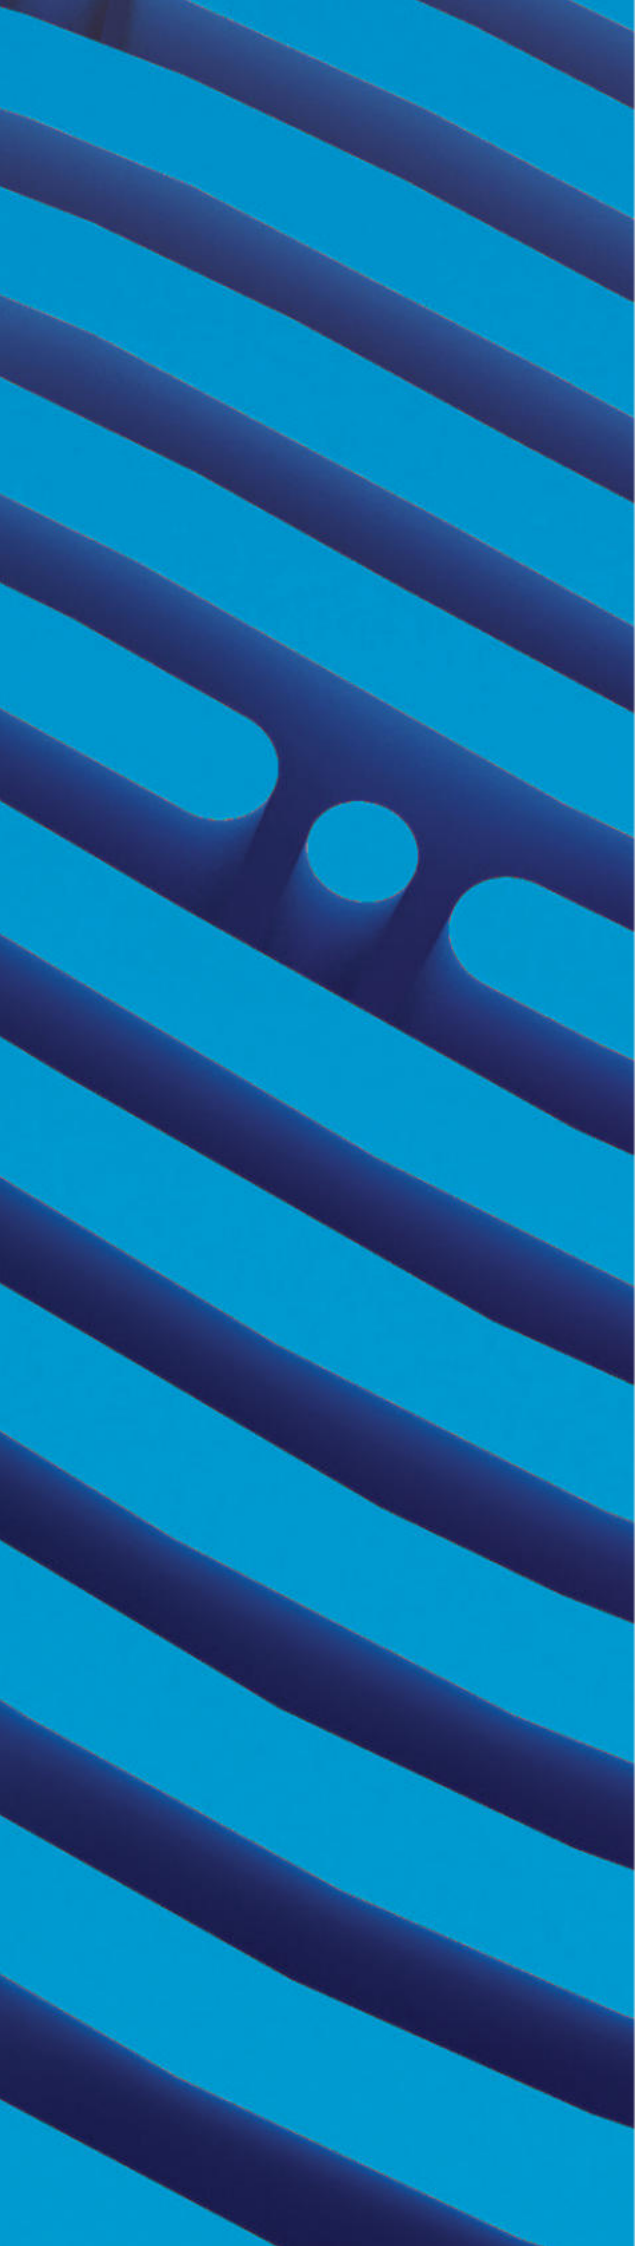

We have the people, skills and technology to help you **overcome your cybersecurity challenges.**

We deliver consultancy in security management, security assessment, testing and audit services, monitoring, detection and incident response services, as well as professional services of cybersecurity systems integration.

We run **20 partnerships** with important manufacturers in cybersecurity, with the help of which we provide you with a comprehensive portfolio of solutions and products.

Within the company we have a **research and development team** that has completed software products for automation in the information security management process, Honeypot technology in industrial control systems, mobile malware detection and investigation.

Complementarily, we provide complete outsourcing of security operations via **Safetech CERT** (STI CERT®), **the first private Computer Emergency Response Team in Romania.**

Why Choose Us

Because of our diversified portfolio, which includes **dozens of state-of-the-art technical solutions**

The more than **1000 projects we have successfully completed** globally

Our own Security Incident Monitoring and Response Team (STI CERT®), operational since 2015, with **24/7/365 coverage**, and accredited by Trusted Introducer

Our **20 technology partnerships** with top suppliers

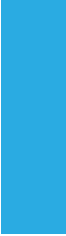

Our rapid response services of **advanced analysis for critical security incidents** and recommendations for remediation

Our **cybersecurity software research and development team**

The **high level of certification** of the company's specialists.

Our Services Portfolio

Securing critical infrastructures (ICS/SCADA)

We combine leading global technologies with our own software products to secure critical infrastructures in industrial environments.

Monitoring and responding to cyber security incidents

We provide 24/7/365 monitoring services to detect threats in real time and minimize their impact.

Security testing and auditing

We assess the effectiveness of cyber security measures, identify security risks and vulnerabilities that can be exploited, assess organizations' compliance with legislation and certain standards.

Information security and risk management

We provide solid expertise and solutions for developing effective strategies, as well as developing and tracking action plans.

Advanced analysis for critical security incidents

We carry out, on an urgent basis, advanced technical investigations for critical incidents, we deliver recommendations and coordinate the client's activities for rapid remediation.

Professional services of systems integration

We design and deliver a set of software applications and hardware devices capable of functioning as a single and coherent system that meet a set of cybersecurity objectives.

Cyber security consulting

We develop and implement policies and procedures, as well as technical controls to protect you against cyber threats and ensure regulatory compliance.

Cyber security training

We provide training on cyber security best practices and ongoing security awareness services for recognizing and dealing with phishing attempts.

Our Customers

We have successfully completed over 1000 projects of security consulting, testing and auditing. Our clients are top companies from utilities, health, insurance, industrial production, retail, public sector. In Romania, seven of the ten largest banks have chosen us as their provider of cyber security services.

Also, the company was involved in over 100 projects for securing critical infrastructures, carried out in the US, Canada, Brazil, Morocco, the EU, Switzerland, Singapore, the Philippines, India, China and New Zealand.

STI CERT® has been operational for 10 years, has 24/7/365 coverage, handles a monthly volume of over 120 billion events and investigates an average of 60,000 security alerts/month, helping to secure over 90,000 employees.

Why Safetech Innovations

With a team of over 80 cyber security specialists, an extensive product portfolio and its own Security Operations Center available 24/7/365, Safetech Innovations is the team you need for protecting you against cyber threats.

Through our infrastructure, expertise and actions we ensure the achievement of the metrics assumed by the Service Level Objective, thus allowing your organization to focus on specific business objectives.

The specialized cybersecurity services and solutions provided by Safetech reduce your costs, increase your operational efficiency and ensure that your organization meet its compliance requirements.

*For additional information about our services and solutions, demonstrations, evaluations or personalized price offers, we invite you to contact us at email sales@safetech.ro or phone **+40 21 3160565**, and your request will be served immediately.*
